

# University of Rhode Island - Keaney Gymnasium Kingston, Rhode Island

## PROJECT SUMMARY:

The Keaney Gymnasium project consisted of the renovation and upgrade to the existing Tootell Gymnasium Space. The complex transformation included a new 30x20 yard indoor turf speed and conditioning area, state of the art accuracy measuring systems, hydrotherapy room, medical assessment rooms, custom designed wall treatments, modernized locker and shower rooms and advanced athletic machinery. This project also consisted of an office suite expansion of the Intramural Sports, Military Science (ROTC), NCAA Compliance, and Athletics Offices. The Keaney Gymnasium was completed within an active busy campus and was accomplished on time and within budget.

## Features of Projects:

- Indoor turf field
- Office expansion
- Hydrotherapy room
- Modern lavatory facilities
- Medical assessment rooms
- Cost Estimating
